When the holders of the allocated shares wish to sell their shares, they must withdraw their shares from the account number 600, through their securities companies, subject however to some operating fees which may be required by the TSD and/or the securities companies. In this case, the Warrant Holders who have been allocated the shares can immediately sell their shares through the SET as soon as the SET grants permission for these new ordinary shares to commence trading on the SET. The Warrant Holders who have been allocated the shares already shall proceed to withdraw shares from account number 600.

Foreign Holders of the Warrants shall not be compensated and shall have no right to claim against the Company in this regard.

Dilution Effects

Effects on the shareholders (Dilution Effects)

As the Warrants is issued to the existing shareholders of the Company in proportion to their respective shareholdings, therefore it will not affect the shareholders on the issuance date of the Warrants. However, in the event that all Warrants are fully exercised by non-existing shareholders, it will affect the shareholders as follows.

1. Control Dilution

If all warrants are exercised by non-existing shareholders of the Company, it will cause the shareholding proportion of the existing shareholders to decrease up to 33.33% (Excluded RO) and 28.57% (Included RO) compared to the shareholding proportion before the issuance and offering of Warrants, which is calculated from the following formula:

In the case of excluded RO

Control Dilution

$$\begin{aligned} &= \frac{\text{Number of shares reserved for the Warrants}}{\text{Number of paid-up shares} + \text{Number of shares reserved for the Warrants}} \\ &= \frac{113,999,995}{227,999,991 + 113,999,995} \\ &= 33.33\% \end{aligned}$$

In the case of included RO

Control Dilution

$$\begin{aligned} &= \frac{\text{Number of shares reserved for the Warrants}}{\text{Number of paid-up shares} + \text{Number of shares reserved for the Warrants}} \\ &= \frac{113,999,995}{227,999,991 + 113,999,995 + 56,999,997} \\ &= 28.57\% \end{aligned}$$

2. Price Dilution

The issuance of the Warrants will affect the share price (Price Dilution) because the exercise price of the warrants is Baht 7 per share, which is lower than the market price before the offering. The market price before the offering is equal to Baht 9.33 per share, which is the weighted average share price of the Company's ordinary shares traded in the Stock Exchange of Thailand for the past 15 consecutive business days prior to the date of the Board of Directors' meeting which resolves to propose the agenda to the Extraordinary General Meeting of Shareholders No. 1/2021 (between September 23, 2021 - October 15, 2021)

Price Dilution

$$\begin{aligned} &= \frac{\text{Pre-sale market price} - \text{Post-sale market price}}{\text{Pre-sale market price}} \\ &= \frac{9.33 - 8.55}{9.33} \\ &= 8.31\% \end{aligned}$$

3. Earnings per Share Dilution

If all warrants are exercised, the Company will be affected by a decrease in profit sharing equal to 33.33% (Excluded RO) and 42.86% (Included RO) when compared to the shareholding proportion before the issuance and offering of warrants. It is calculated from the following formula (Unit : Thousand Baht):

In the case of excluded RO

Earnings per Share Dilution

$$= \frac{\text{Pre-sale earnings per share} - \text{Post-sale earnings per share}}{\text{Pre-sale earnings per share}}$$

$$= \frac{(69,982/228,000) - (69,982/(228,000 + 114,000))}{(69,982/228,000)}$$

$$= 33.33\%$$

In the case of included RO

Earnings per Share Dilution

$$= \frac{\text{Pre-sale earnings per share} - \text{Post-sale earnings per share}}{\text{Pre-sale earnings per share}}$$

$$= \frac{(69,982/228,000) - (69,982/(228,000 + 114,000 + 57,000))}{(69,982/228,000)}$$

$$= 42.86\%$$

Profit (Loss) (last 4 quarters according to the financial statements ended September 30, 2021) = 69,982 thousand Baht

EPS before the offering = (Net profit of the last 4 quarters / number of paid-up shares) = 0.31 Baht per share

EPS after the offering (excluded RO) = (Net profit for the last 4 quarters / number of paid-up shares + number of shares reserved for this offering) = 0.20 Baht per share

EPS after the offering (included RO) = (Net profit for the last 4 quarters / number of paid-up shares + number of shares reserved for this offering) = 0.18 Baht per share
